

ELESTA News-Exhibition/Messe

building automation

light+building

In the context of the **light+building 2008** from 06-11 April in Frankfurt **ELESTA building automation** presented its product portfolio to interested visitors and customers.

The **light+building** noticed a new attendance record with approx. 170,000 visitors this year. The number of exhibitors increased to approximately 2200. The number of foreign visitors likewise increased compared with 2006. This found its confirmation in numerous discussions with foreign visitors. Elesta introduced several product innovations of the **Controlesta RCO System**.

With the **RCO tool** a modern and innovative engineering tool has been introduced which supports text oriented programming as well as graphical programming. The **BACnet** protocols (Ethernet/IP) will be introduced to the market this year. Graphical Touch Panels have been another highlight. The **Touch Panels** can be connected serial to the RCO system. They are available in sizes from 3,5"-12,1" with monochrome or coloured display.

A uniformly programming software for all displays takes care of the easy implementation into the **Controlesta RCO-System**.

Fan Coil Controller with room units for wall and flush mounting with an integrated display has been another new highlight. The controller can be connected via **Modus** to the RCO-System.
