

The New Generation launch

Premiere of the new Controlesta RCO-D at the
light + building Exhibition, Frankfurt.

With the introduction of new Master Controllers and I/O-Modules in the Controlesta RCO product range, ELESTA is setting new dimensions within BMS. The modular multi-master concept creates the basis for highly efficient and economical completion of BMS projects.

Our System offers:

- Various integration and communication abilities
- Master with integrated colour display for mounting on a DIN-rail or panel door
- Reduction in the variety of equipment and wiring through the integration of coupling relays within I/O-Modules
- Proven control comfort "The trick with the click"
